Hazard Reporting

If you have concerns about health or safety hazards in the workplace you should raise them with your supervisor or manager so that they do not go unnoticed and remedial action can be taken.

Recognising that some people can feel uncomfortable about raising hazard issues we also have a system which allows you to report your concerns in writing and (should you choose) anonymously. Complete the Hazard Report form at the back of this handbook, put it in an envelope and place it in the mailbox.

Should you need additional Hazard Log forms or would rather not use the one in this booklet you can get additional copies by asking your line manager.

We encourage your participation in reporting hazards, so that defects or hazards can be quickly identified and remedied before they can cause injury or ill-health to you or your colleagues.

Consultation

To promote your involvement in the health and safety of the organisation we provide various formal opportunities for staff consultation. Between those opportunities you should raise any general concerns about health and safety at work with your supervisor or manager.

Every effort will be made to provide consultation and communication on important health and safety issues such as:

- Risk assessments and subsequent safe systems of work.
- Workplace hazards.
- Emergency procedures.
- New working practices and new work equipment.
- Workplace welfare issues.

Occupational Health

Hazards that have the potential to harm your health, or anyone connected with our activities are identified in our risk assessments.

It is our policy that we only use substances hazardous to health where there is no alternative safe substance that could be used. Where we have to use hazardous substances we always try to use those that present the lowest level of risk to people who use them.

Where risk assessment identifies the presence of occupational health hazards and risks we will always implement suitable control measures. Where occupational health surveillance is recognised as being able to recognise and protect against ill-health appropriate systems will be implemented. You will be told if you need to be involved.

We anticipate that you will cooperate and take part in health monitoring which will be for your benefit. The specific results of any monitoring carried out by a registered occupational health practitioner will always be confidential.

We also expect you to follow our rules for managing and controlling the spread of societal illnesses whilst at work.

Risk Assessments

We carry out the process of risk assessment to reduce the risk of injury and ill health, and identify:

- The significant hazards that you may be exposed to.
- Who could be harmed and how.
- The likelihood of anyone being harmed by the hazard.
- Existing control measures.
- What (if any) further actions are required.
- Appropriate safe systems of work and necessary training.

For further information on risk assessment and to view those relevant to your work you should speak to your supervisor or manager.
